

Now there is a better way to maintain efficient water flow in your household gutters without all the work or expense. The Hedgehog™ 3 dimensional Gutter Protection System, is a design registered, award winning concept, that keeps your gutters clear while moving water off your roof and away from your home.

Four years of independent testing and two awards for innovative excellence establish the Hedgehog™ as the most effective gutter protection system you can buy. It is effective as a leaf guard or bird barrier, or as a primary filter for rainwater collection.

Hedgehogs™ are also supremely effective in preventing leaf build up in roof valleys - a major cause of costly internal damage.

Erosion around your home, water damage to foundations, gutters that pull free, fascia boards that rot, or internal flooding in walls and ceilings - are just some of the problems clogged gutters can cause.

If you are considering buying a cheaper gutter protection system it would pay to examine the advantages of the Hedgehog™. A lot of time, effort and money can be wasted installing a budget priced gutter guard that simply doesn't work.

The premium you pay for Hedgehogs™ is rewarded the moment you begin to install them. Where other systems rely on complete coverage, Hedgehog™ sections need only be installed where problem areas exist.

Hedgehog™ gutter filters can be installed quickly, easily and safely by most handy persons. Cleaning is simple. The Hedgehogs™ ability to 'shed' leaves and continue operating under the most adverse conditions means less maintenance and more leisure time.

Hedgehogs™ are unique and completely different to other gutter guards. They are three dimensional (as shown below) and do not form a tunnel when installed. This allows you to just treat the main leaf fall areas, if you wish.

Install some HEDGEHOGS™ today

HEDGEHOG™ Gutter Protection System

Water flows through the bristles even when there are leaves on them. In the worst conditions water continues to filter through.

Conventional Single Plane Gutter Protector

Leaves can form a seal over single plane gutter system, making it less effective. Water flows over the leaves and off the edge of the gutter.

HEDGEHOG™ - the ONLY way to keep your gutters flowing.
