

HEDGEHOG™

Fitting Instructions

Hedgehogs™ are available in convenient one metre lengths to suit most gutter profiles. Check which profile matches the gutter on your house and note the height and width as shown below, so you can order the correct Hedgehog™.

For best results, clean gutters and place Hedgehogs™ end to end, simply bend around corners or cut to size with wire cutters.

There is no need to adjust tiles or cut back the roof sheeting, as the Hedgehogs™ can be pushed through a gap of just 20mm and the bristles will spring back to do their work of protecting your gutters.

No existing gutter guard can stop dirt and dust building up as silt in the bottom of your gutters.

Silt holds moisture and if not flushed out causes rapid corrosion of your gutters, so ease of access for cleaning is essential.

With Hedgehogs™ simply lift out when necessary, shake the Hedgehogs™, hose and flush out the silt, and replace. It's as easy as that!

So Easy - Just Lift, Shake, Hose and Replace

HEDGEHOG™

The Advantages

- Independent tests have shown that Hedgehog™ gutter filters stop more rubbish yet require less cleaning than any other gutter protection system tested.
- Unique 3 dimensional filter ability - other products are flat and are generally less effective.
- Installation is easy. Simply bend around corners or cut with wire cutters where necessary.
- Made from high quality, long life, double UV protected polypropylene.
- Less cleaning - keeps gutters 'open' and flowing. Leaves don't matt and form a seal over the gutter.
- Keeps gutters dryer - Hedgehog™ allows air to circulate around leaves - leaves blow away - less cleaning.
- Helps prevent gutter rusting by keeping vegetation off the gutter floor.
- Works under the most severe conditions.
- Water filters through bristles - mud not stirred up - ideal for rainwater collection areas.
- **Deters** birds nesting under roof edges.

HEDGEHOG™
It's the bristles that do it!

The HEDGEHOG™

GUTTER PROTECTION SYSTEM

Stops everything but the rain.
