

HEDGEHOG™

gutter guard

Now there is a smarter way to maintain efficient water flow in your gutters.

The Hedgehog™ gutter guard is a patented award winning concept that is easy to install. Hedgehog™ comes in one metre lengths & can bend around corners. It's easy to remove & re-install for maintenance on the gutter. The Hedgehog™ is excellent for vermin proofing homes, sheds, & warehouses. Hedgehogs™ prickly body deters birds, rats, mice, & snakes away from the gutters & ceilings. If you own a water tank and have Hedgehogs™ in the gutters, less debris is stirred up creating cleaner drinking water.

Benefits

- ☀ 3-dimensional filter ability.
- ☀ Easy installation.
- ☀ Requires minimal cleaning.
- ☀ Easy to maintain and clean.
- ☀ No glue or screws needed.
- ☀ 100% Australian made.
- ☀ Ideal for rainwater collection areas.
- ☀ Sized to fit all gutter profiles.
- ☀ 10 year warranty.
- ☀ High quality, long life, material.
- ☀ Double UV treated polypropylene.
- ☀ Prickly body deters rodents & birds.

HEDGEHOG™ Gutter guard

Ideal for collecting water for a tank, pool or spa. Less dust and debris is stirred up when water enters the gutter. Hedgehog™ allows the water to run down the bristles and "soft fall" into the gutters.

Water flows through the bristles even when there are leaves on them. In the worst conditions water continues to filter through.

Conventional single plane gutter protection

Any water that does get through traditional gutter protection, stirs up the debris creating a sludge which increasing the chance of contaminated water & rusting gutters.

Leaves can form a seal over single plane gutter systems making it less effective. Water flows over the leaves and off the edge of the gutter.
